

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. CLASSIFIED LIST  
OF THE  
NAMES & LATIN SYNONYMS  
OF THE  
BRITISH BIRDS;

INCLUDING THE NAMES OF ALL SPECIES OBSERVED UP TO THE  
PRESENT TIME IN THE BRITISH ISLES.

## PREFACE.

---

IN publishing this list of British Birds, I may be allowed to observe, that originally it was drawn up only for the purpose of arranging and labelling a collection. Since then I have had it printed so as to be able to supply several friends, who equally with myself have found the want of a classified list. I therefore trust, that those into whose hands it may fall will excuse its many imperfections.

The English names, for the most part, are those adopted by the publisher of the Zoologist List. The arrangement is the same as that in Mr. Yarrell's valuable work.

The Latin Synonyms are chiefly those employed by Bonaparte in his Geographical and Comparative list of European and American birds.

*The following are the names of the Naturalists referred to  
in the list.*

---

Bechstein.	Latham.
Belon.	Lesson.
Buonaparte, Charles Lucien, Prince of Musignano and Canino.	Linnaeus.
Boie.	Meyer.
Brehm.	Nilsson.
Brisson.	Ranz.
Brunnich.	Ray.
Cuvier.	Sabine.
Dumeril.	Savi.
Eyton.	Savigny.
Fleming.	Selby.
Gmelin.	Sibbald.
Gould.	Stephens.
Gray, G. R.	Swainson.
Jardine.	Temminek.
Jenyns.	Vieillot.
Illiger.	Vigors.
	Wilson.
	Yarrell.

## ERRATA AND ADDENDA.

---

*The Latin synonyms of some of the following species have been omitted.*

PAGE 6. 74.           YELLOW BILLED WILLOW WREN.  
                          Sylvia Hippolais. *Lath.*

This bird is identical with Latham's Pettychaps. The Synonym (S. hippolais) however, has been by other authors applied to the other British Species.

PAGE 9. 112.       YELLOW-BACKED WHIDAH FINCH.  
                          Vidua Chrysonota. *Swains.*

PAGE 11. 132.           For *Viell* read *Vieill*.

PAGE 11. 134.       ASIATIC MINOR GRACKLE.  
                          Gracula Roligiosa.

PAGE 12.               For SCANCORES read SCANSORES.

The family name has also been inserted in the middle of the next page by mistake.

PAGE 15. 176.       The variety of the Common Pheasant called the RINGED PHEASANT, has been by some considered as a distinct species.

PAGE 15. 177. The SPURIOUS GROUSE is probably only a hybrid, and not a distinct species.

PAGE 15. 182.           It is doubtful whether the ROCK PTARMIGAN is truly a British species.

PAGE 20. 247.       BARTRAM'S SANDPIPER.  
                          Actiturus Bartramius. *Bonap.*  
                          Or Tringa Bartramia. *Wils.*

PAGE 21. 258.       For *Gallinule* read *Gallinula*.

PAGE 24. 297. PAGET'S POCHARD. Figured by Yarrell as  
THE AMERICAN SCAUP.

Fuligula Mariloides. *Yarr.*

PAGE 24. 301. COLLARED DUCK.

Fuligula Collaris. *Gray.*

PAGE 24. 366. A bird called the DUSKY SHEARWATER  
has been introduced into some lists of British Birds,  
(i. e. Doubleday's and the Zoologist). It is doubtful  
whether this, as a distinct species from the Dusky  
Petrel, first described this year by Mr. Yarrell, can  
be considered a British Bird.
